IMPORTANT NOTIFICATION

International filing date (day/month/year)

21.08.2003

Priority date (day/month/year) 22.08.2002

Applicant

E.I. DU PONT DE NEMOURS AND COMPANY et al.

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

I. Basis o	f the r	report
------------	---------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	scription, Pages						
	1-2	5	as originally filed					
	Cla	ims, Numbers						
	1-3		as originally filed					
2.	Wit lan	With regard to the language , all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.						
	The	These elements were available or furnished to this Authority in the following language: , which is:						
		the language of a tra	anslation furnished for the purposes of the international search (under Rule 23.1(l	o)).				
		the language of publ	lication of the international application (under Rule 48.3(b)).					
		the language of a translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).						
3.	 With regard to any nucleotide and/or amino acid sequence disclosed in the international application international preliminary examination was carried out on the basis of the sequence listing: 							
		contained in the inte	rnational application in written form.					
		filed together with th	e international application in computer readable form.					
		furnished subsequer	ntly to this Authority in written form.					
		furnished subsequer	ntly to this Authority in computer readable form.					
		☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.						
		The statement that the listing has been furnitude.	he information recorded in computer readable form is identical to the written sequished.	ence				
4.	The	The amendments have resulted in the cancellation of:						
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been been considered to g	established as if (some of) the amendments had not been made, since they have beyond the disclosure as filed (Rule 70.2(c)).	е				
		(Any replacement sh	neet containing such amendments must be referred to under item 1 and annexed	to this				
6.	Add	litional observations, i	f necessary:

EXAMINATION REPORT - SEPARATE SHEET

D1: EP-A-0434409 D2: WO-A-9951553

D1 and D2 can be regarded as disclosing the closest prior art. Both documents 1. disclose the same type of reaction using the same educts and yielding the same products.

The only and most important difference between these prior art documents and the claimed process is represented by the use of different catalysts.

D1 discloses the use of a chromium oxide based catalyst containing copper, nickel and alkali metals.

D2 discloses the use of trivalent chromium catalysts.

In contrast to D1/D2 the claimed process uses crystalline alpha-chromium oxide containing nickel and/or trivalent cobalt in certain amounts.

The subject matter of present claims 1 to 3 is thus novel over the disclosure of D1 and D2 (PCT Article 33.2).

The underlying problem can be defined by the provision of an alternative process 2. for preparing the title compounds.

The solution is represented by the claimed process which is characterised by the use of the different catalyst. The problem has thus been solved as can be seen by the performed examples.

The prior art gives no hint towards the use of theatalyst as in the claimed process. In addition due to the use of this catalyst the reaction temperature can be lowered compared with the processes of D1 and D2.

The subject matter of present claims 1 to 3 is thus based on an inventive step over the disclosure of D1 and D2 (PCT Article 33.3).

3. Industrial applicability is given for all claims (PCT Article 33.4).
